

THERMODET® new embossing G22 Textile – woven

MITRAS Materials presents the new embossing type

THERMODET® Embossing G22 (Textile - woven).

The embossing type G22 is available for various materials
of our product line THERMODET® for example:

- THERMODET® ABS
- THERMODET® TPU/ABS
- THERMODET® ASA/ABS
- THERMODET® HIPS+PE-Blend
- Maximum standard sheet size: 1250x3000mm

Examples of application:

THERMODET® TPU/ABS RT1660 super-mat Black or Grey G22

An elegant solution with a soft-touch effect on the surface for interior applications of vehicles for example dash board, interior covers, etc.

THERMODET® ABS RT1258 Beige or Grey G22

A solution with a good price performance for interior applications of vehicles.

THERMODET® ASA/ABS Beige G22

A smart solution equipped with an UV-resistant top layer suitable for example for interior covers of caravan doors.
